

Item 10 - GP 28th Aug 2014

The Blue Plaques have been cycling through committee for around 6-7 months if not longer. Having received a budget of £1000 for the Blue Plaques we need to move forward with finding out the location of the homes we are wishing to mount them to. Once we have locations we need to contact the home owners and see if they will give us permission to mount a plaque onto the house.

Once we have our definitive answers and quantities for each we can progress with production of the said plaques. The time scale for production is yet unknown. Once we have sent off for production we need permission from Calderdale to mount one or two brass plaques in the Town Hall Council Chamber. Then we can send off production for the brass plaques.

Once all plaques have been delivered and produced we will need to then find a suitable local company to fix them to the house.
