

Dear Lesley,

We are delighted to support Walsden Neighbourhood Watch and Community Group in their endeavours to create a wellness garden for the community of Walsden at Library Corner.

Walsden has already made great progress in improving the area for the benefit of the community and the creation of a wellness garden will enhance the area even further.

Gardening is a great way of getting people involved in the great outdoors and is of immense benefit in terms of mental wellbeing.

We wish you every success with your plans and very much look forward to seeing the completed garden, but in the meantime please do not hesitate to contact us should you feel we could be of value in the planning of the project.

Yours sincerely

*Jean Butterworth*
