Hi Colin,

Emergency Planning have got back to me with the following:

We can't open the hubs to the public as we would risks health and lives of staff, volunteers and public. (Silver would only consider opening the hubs in a Covid Secure manner should there be a flood on the level of Feb 2020).

The Business Dev team are drafting up the virtual element of the changes but for time the public would be nudged towards registering recovery issues with the Customer First, triaged by the control room and relayed to neighbourhood teams for action/info.

Emergency Planning will be putting out at briefing at some stage – I have requested this so I can forward it on to you.
