In a 30mph speed limit	in a 40mph speed limit	ACTION
Where the 85th %ile is 35mph or greater	Where the 85th %ile is 46mph or greater	Possibility of referral to Community Police
Where the 85th %ile is 31mph to 34mph	Where the 85th %ile is 41mph to 45mph	Possibility of further SID deployment
Where the 85th %ile is 30mph or below	Where the 85th %ile is 40mph or below	No Further Action required

The 85th percentile speed is the speed at or below which 85 percent of the motorists drive on a given road. For example: if the 85th percentile speed within a 30mph area is measured at 41mph, this would indicate that 85% of traffic is travelling at 41mph or less. It would also indicate that the remaining 15% of vehicles are travelling at speeds greater than 41mph.
