To: The Manager of Lidl, Todmorden

Delivered by hand: 19 October 2022

Dear Sir/Madam,

**Maintenance of Attenuation Tanks at Lidl, Todmorden**

The issue of potential flooding in the Halifax Rd area near the Lidl site is considered by members on a monthly basis at their Development Committee meeting. At the last meeting on 12 October, it was mentioned that it looks like the attenuation tanks next to Lidl are overgrown and there is a concern that their function would be reduced.

Mr Paul Swales, of the Environment Agency, presented at this meeting to brief members on flooding initiatives in the Todmorden area. He said that attenuation tanks require regular maintenance.

I should be grateful if you could please let me know whether there is a maintenance schedule for the attenuation tanks and when they were last attended.

Yours sincerely,

Susan Miles

Assistant Town Clerk, Todmorden Town Council
