Item 9b of 25 May 2022 Development Committee Meeting - Outstanding Issues Development Register

5c continued	see above	see above	high	see above	see above	This was raised in discussion with Stephen Lee. As built drawings were requested from Lidl but have still not been provided to CMBC. CMBC never received detailed design drawings for the compensatory flood pond. The site drainage drawings submitted during the planning process appear adequate and do not give cause for further survey to be undertaken on the Lidl site. CMBC have contacted Yorkshire Water requesting confirmation that the site sewerage was connected to the Yorkshire Water sewers as shown on the drawings submitted and await confirmation. CMBC have received hydraulic modelling information from Yorkshire Water which demonstrates the sewer systems in Halifax Road meet the minimum statutory requirements. CMBC advise that the existing problem of flooding gullies was caused by 'surcharging'. This is where there is insufficient capacity for the water to drain away and this causes the flooding from gullies. CMBC are planning to undertake survey work to establish the connectivity of the highway gullies in Halifax Road. Due to traffic management being required to undertake this work and other traffic management currently being in place in Todmorden they have not yet programmed in these works. They will work with highways colleagues to undertake this work as soon as is practical - 25/11

The path/banking as you turn left into Manor Close is mowed regularly by the resident next to it because of the danger backing out of the drive. This is to stop the road being obscured by very long grass to the right as you pull out of Manor Close. On the completion of Manor Close, the resulting banking soil was levelled and laid with a sandy mix so pedestrians could walk on it without being on the road instead - 13/2.
