Item 10 – Development Committee 2nd September 2026

Correspondence from Network Rail regarding the Access for All Project.

Good afternoon

Todmorden Town Council's Development Committee asked me to contact you again, regarding the Access for All project at Todmorden Train Station, to ask about anticipated disruption / closure of platforms whilst the works are carried out at the station.

Please could you let me know what the anticipated disruptions are, who they will affect (pedestrians, car drivers, train passengers etc), and what mitigating measures will be taken by Network Rail to reduce disruption where possible.

Thank you.

Kind regards
Jess Norcliffe

Good Afternoon,

Thankyou for your patience.

Network Rail are currently working with our contractor on finalising designs and construction methodology. The disruption required is not confirmed as of yet, however we will be sharing at a local event later this year when this information is confirmed.

It is not anticipated any platforms will be fully closed during this time, and trains will still be running at Todmorden station.

A presence may be seen at the station over the coming weeks whilst surveys are being undertaken to aid with the above works.

I hope this helps.

Kindest Regards,
Community Relations
